

Sizewell A & B Stakeholder Group

February 2019

1. SIZEWELL

The transfer of Bardwell site management to Sizewell A has now been completed.

Work is continuing on demolition of the Nation Grid sub station with the removal of asbestos and other hazardous materials final demolition is expected in April

Removal of material from the ponds is continuing.

2. SIZEWELL B

Sizewell B continues to generate at full power. Preparations are well advanced for that next refuelling outage.

3. NUCLEAR DECOMMISSIONING AUTHORITY

Discussions on the continuous decommissioning of one of more of the redundant Magnox power stations is continuing and if communities think that a power station in their area should be part of that programme they are urged to make their views known.

Radioactive Waste Management a subsidiary of the NDA has started the search for a community to volunteer to host a Geological Disposal Facility which would be designed to store high level radioactive waste.

Terry Hodgson, SSG Representative
